

KEYSTONE STORIES

HABITATS ARE HOME

WEEKLY HIGHLIGHTS

This week at Camp Keystone, campers enjoyed exploring habitats. Ask your camper what animals need in their habitats? We discovered adaptations are features of creatures which help them survive. Ask your camper if they can share an adaptation salmon have to help them survive?

A HIKE IN THE FOREST

On our field trip this week, we explored the forest along Tenmile Creek! We marveled at how big the leaves of skunk cabbage are, and got to see clown millipedes looking for a cozy place to take a nap. We learned that some animals, like salmon, use camouflage to blend in with their habitats and played our own version of a camouflage game. We also looked for signs of animals - ask your camper if they saw, or maybe heard, any signs of animals while investigating in the forest on their field trip.

Throughout the week, we learned about our Indigenous neighbors - Lummi Nation and Nooksack Tribe. We talked about the importance of gratitude. What is something your camper is thankful for? We are grateful to each of you for choosing to send your child to Camp Keystone, and hope to see you again this summer.
